

Ready-to-install design surfaces

For wedi Fundo shower systems with functional design elements

A quick and easy seamless bathroom

wedi Top® design surfaces

wedi Top Line offers a broad range of ready-to-use surfaces in five colours – a homogeneous pure white and four additional textured shades with a natural stone resemblance. The range consists of matching surfaces for Fundo Plano, Primo and Riolito neo flush-to-floor shower elements and for selected wedi functional design elements, as well as offering special surfaces for the cladding of walls and other vertical surfaces.

Thanks to the special material properties, all design surfaces are quick and easy to install, can be cut simply by using a standard hand tool and are equally suitable for new builds, renovations and modernisations.

The benefits at a glance

Modern design thanks to seamless surfaces and stylish colours

Simple installation – ideal for quick bathroom design

Perfect match – technology and design from one manufacturer

Everything from a single source – focused and efficient customer support

Modern design

Thanks to seamless surfaces and stylish colours

wedi Top Line owes its modern design to its seamless nature, organic feel and natural colours. Product names reflect not only the particular shade but also the texture: pure white has a homogeneous white surface to match white ceramic sanitary ware whilst other colours have a natural stone look resemblance.

The surfaces are made from a high-quality material which is coloured all the way through which makes installation particularly flexible since any possible shortening or adjustments to the material don't result in unsightly cut edges. wedi Top Line allows for limitless creativity since any colour combination results in a sophisticated finish (for carbon black complemented by sahara beige see opposite page), wedi Top Wall surfaces can also be cut into desired shapes and then various colours can be arranged to create characteristic patterns in a blink of an eye.

Broad product portfolio

Many clients today want a bathroom with refined surfaces and no joint lines to break up the design – as a modern alternative to the classic tiled look. wedi Top Line meets these requirements and offers a broad and varied portfolio of ready-to-install pre-formed surface solutions perfectly matched to wedi Fundo shower elements Primo, Plano and Riolito neo and to wedi functional design elements such as the wedi Sanoasa bench 3, wedi I-Board or wedi Sanwell Niches. Also part of the same range, the wedi Top Wall is perfect as a wall solution in the shower for example but equally as suitable for cladding other vertical surfaces and barefoot areas in the bathroom. It is straightforward and quick to install and with its large formats (up to 2.5 × 1.2 m) it gives an exclusive overall result.

Non-slip in the wet area

For safety, it is important that the surfaces in the wet area are non-slip too. Depending on the surface, the design surfaces of wedi Top Line offer medium to high slip-resistance in accordance with DIN 51097. They not only provide secure footing, they also give a pleasantly warm feeling on the skin and underfoot.

Slope		Slip resistance	German standard DIN 51097	Surface	Application
6° ≤ 12°		Standard	–	–	Private area
12° ≤ 18°		Medium	A	Fundo Top Homogeneous surface	Private area
18° ≤ 24°		High	B	Fundo Top Natural stone look	Private and public / commercial area
24° >		Very high	C	–	Public / commercial area

wedi Sanoasa Top
as a bench surface

From the shower through bathroom furniture to the bathtub – wedi Top design surfaces allow for almost unlimited variety of applications in the bathroom. As a custom fit surface for wedi Fundo shower elements, the Fundo Top can be installed quickly and easily, what's more, thanks to its thickness of only 6 mm, it's easy to incorporate into a stylish step-up shower design or a spacious flush-to-floor and therefore accessible shower area – ideal for older clients and best agers who place high value on convenience.

The large format, decorative wedi Top Wall surfaces – thanks to their versatility in being suitable to use on all common surfaces from tiles through plaster to plasterboard – provide a stylish, colour-coordinated cladding across the whole bathroom without having to remove old surfaces saving enormously on the renovation time.

Simple installation

Ideal for quick bathroom design

Thanks to special material properties, no complex preparation is required for installation of wedi Top surfaces. They can easily be individually tailored to the on-site requirements of the wet room and can be cut using standard hand tools. For the matching surfaces for the wedi Fundo shower elements and the functional design elements, this is only necessary upon request, but it simplifies the installation of wedi Top Wall for the wall surfaces enormously. Since the material is coloured all the way through, no profiles or other tools are needed to cover the resulting cut edges.

Before: old bathroom with bathtub

After: modern bathroom with wedi Top design surfaces

Practical to use

Adhesion to the appropriate wedi Fundo shower element including slope integrated in the factory, the various functional design elements or the wall surfaces is done simply and securely with wedi 610 adhesive sealant – processing times are reduced and installation is completed completely dust-free, without the need for drilling or screws. The bathroom can thus be finished quickly and used again.

Can be cut precisely with commercial hand-held circular saws.

Can be bonded to tiles, plaster or plaster-board, as well as wedi system components.

Particularly easy to clean with household cleaners and a sponge.

Products used

- 1 wedi Top Wall ▪ ready-to-install surface for walls
- 2 wedi Sanwell Top Niche ▪ ready-to-install surface for wedi Sanwell niches
- 3 Fundo Top ▪ ready-to-install surface for Fundo Plano shower elements
- 4 wedi 610 ▪ adhesive sealant for waterproof adhesion of wedi Top Wall and Fundo Top to wedi building boards and the wedi Fundo shower element
- 5 wedi Sanwell wall element ▪ free-standing sturdy partition wall with niche solution
- 6 Fundo Plano ▪ extremely flat flush to shower element with integrated drain technology
- 7 wedi 320 ▪ for full-surface bonding of tiles and the Fundo shower elements to the substrate

Perfect match

Technology and design from one manufacturer

The world of wedi systems offers all of the technical components for designing and sealing bathrooms and wet rooms – from the shower area through wall surfaces to special shelf or wash stand constructions. wedi Top Line adds the design aspect to the technology – the special material of these high-quality surfaces is a perfect match to wedi Fundo Shower elements, wedi functional design elements and wedi building boards – offering a unique option of designing a wedi bathroom complete with seamless surface finish in modern colours and textures. Every combination of a wedi element and a matching Top surface is tested and 100 % waterproof, therefore, the wedi Top Line offers a clear system advantage over surfaces from other manufacturers. For example, a shower area made of a wedi Fundo shower element and wedi building boards then finished with matching Fundo Top and Top Wall design surfaces can be realised in record time – signed and sealed by wedi.

In short: a wedi element plus a wedi Top surface always provides a top result! A complete bathroom / wet room from a single source – wedi as a system provider offers all necessary solutions from 100 % waterproof substructure elements through a wide range of installation accessories to seamless design surfaces – with a system guarantee of at least 10 years that gives a long-lasting peace of mind for architects, planners, installers and end-users alike.

Everything from a single source

Focused and efficient customer support

Cost-effectiveness, convenience and reliability – these are main factors when deciding on having all components from the same manufacturer. Choosing the right products and/or systems usually involves a many suppliers in the planning of bathroom projects. Whilst the choice is abundant, the question that often arises is: are the solutions we've chosen technically compatible and fit together visually? Thanks to complete system solutions wedi offers for designing the entire bathroom, architects, planners, installers and retailers find the customer experience much better since they no longer need to go through catalogues from a wide range of providers or make many phone calls to ensure compatibility of products of different brands.

A broad range for every bathroom situation

Whether for simple renovation of a shower cubicle or for building a completely new bathroom – thanks to the broad wedi range, retailers and installers are able to offer clients perfect products and system solutions tailored to their individual bathroom situation. Numerous functional design elements create added value by incorporating practical solutions that not only provide comfort or storage for example but also serve as a visual highlight. The design of a simple single or guest bathroom is therefore just as easily possible as the design and implementation of a spacious family bathroom or an accessible multi-generation bathroom.

Everything from a single source – that also means: wedi is the main contact before, during and after the construction phase for a bathroom. This makes handling a lot easier for retailers and installers and, at the same time, offers peace of mind for clients. Implementation of their project is done quickly and they know exactly which provider they can turn to if needed, even years after completion. A win-win situation for everyone involved in the project.
